New Java Class   —   □   ×

Java Class
Create a new Java class.

Source folder: springboot-first-app/src/main/java   Browse...
Package: com.springboot.app   Browse...
☐ Enclosing type: Browse...

Name: WelcomeController
Modifiers: ⦿ public   ○ package   ○ private   ○ protected
                 ☐ abstract ☐ final   ☐ static
                 ⦿ none   ○ sealed   ○ non-sealed   ○ final
Superclass: java.lang.Object   Browse...
Interfaces: Add...
                                                           Remove

Which method stubs would you like to create?
                 ☐ public static void main(String[] args)
                 ☐ Constructors from superclass
                 ☑ Inherited abstract methods
Do you want to add comments? (Configure templates and default value here)
                 ☐ Generate comments

    ?   < Back   Next >   Finish   Cancel
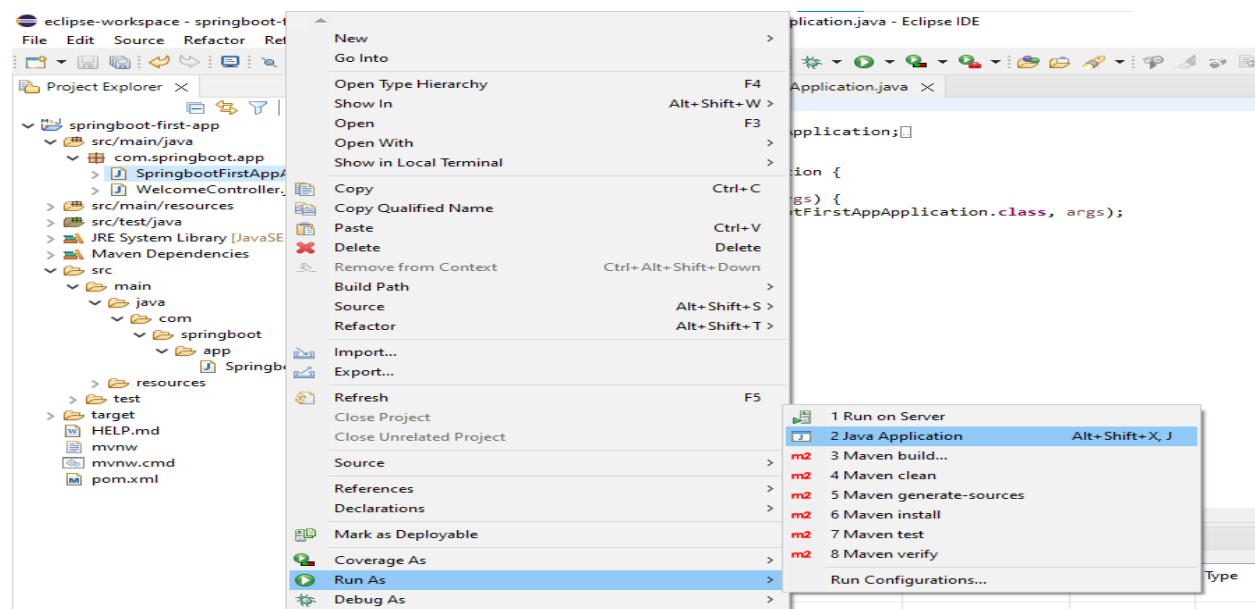

WRITE CODE IN WELCOMECONTROLLER.JAVA FILE

NOW GO TO springbootfirstappapplication.java
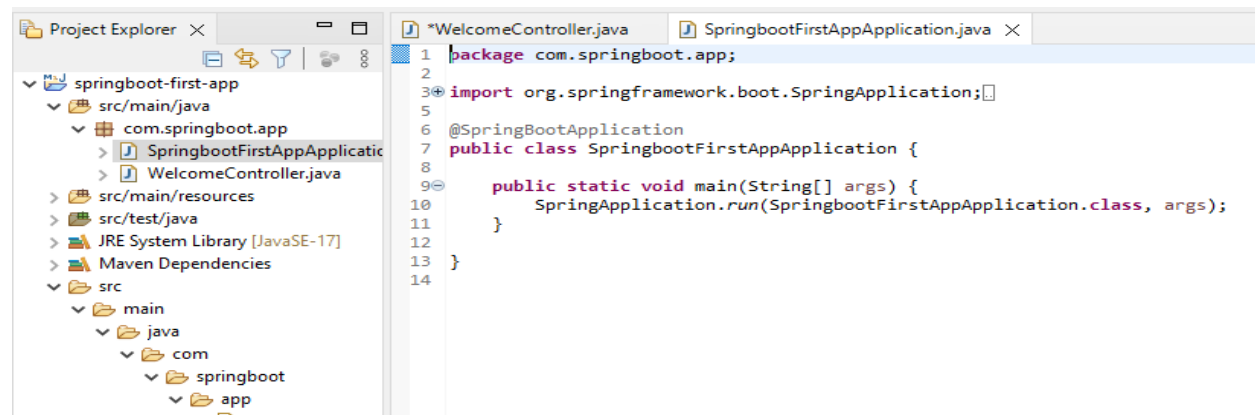

RUN THE PROGRAM (AS JAVA APPLICATION)

GO TO BROWSER TYPE>localhost:8080/welcome
